CORRELIA BIOSYSTEMS

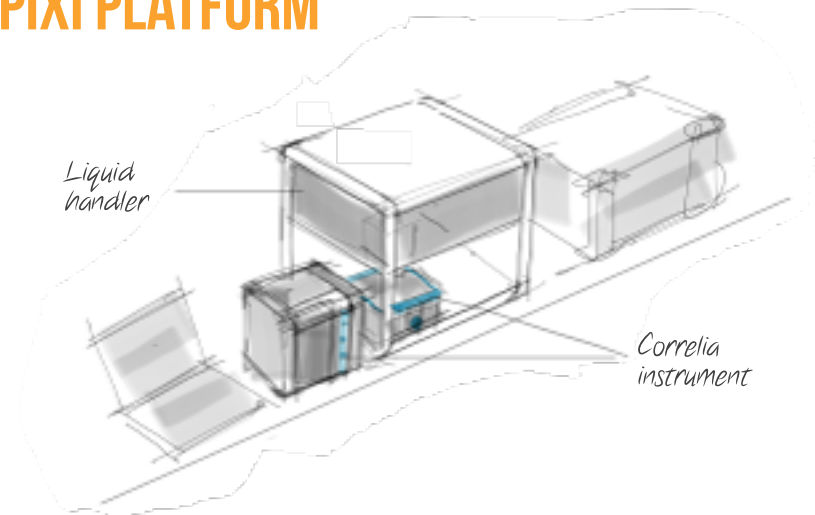

The Next-Generation of Protein
Quantification

Fully automated, bench-top
immunoassay platform

PIXI PLATFORM

1. Load samples, reagents and cartridge onto liquid handler*
2. Press Run button and walkway
3. Image and analyze data

* Compatible with most major liquid handlers

2020 SLAS Ignite Award
Winner

PERFORMANCE

Fast turnaround

- 15 min - 1 hr ELISA

Low input

- 1 uL sample volume

High sensitivity

- pg/mL detection

Broad applicability

- 5 log dynamic range

High-throughput automation

- Walk-away workflow for up to 96 samples

Excellent data quality

APPLICATION AREAS

Application Areas

PK/PD

Biomarkers

Dx

Point-of-Care

QC assays for cell & gene therapy

Current Panels

Inflammatory biomarkers, cytokines, biologics, drug-protein conjugates, human, mouse, primate targets, ADA panels,
